

ECO-CENTER
STINA

Sustainable Development Platform

#StinaPodillia

Eco-Center Mission

To serve the platform of collaboration between different actors that are interested in practical implementation of ideas of sustainable development, exchange and preservation of local knowledge and realization of other rural initiatives

Eco-Center Infrastructure

Eco-Center itself is a house and other facilities built in a traditional way and connected with other rural properties of the picturesque Stina village that lies in the canyon of Rusava river.

We host groups and other guests, and often engage the local community to our initiatives.

Environmental education, utilization of eco-friendly solutions and innovations

Direction 1

**Preservation and utilization of traditional
knowledge, promotion of cultural heritage**

Direction 2

Direction 3

**Improvement of economic prospects
through stimulation of entrepreneurship,
especially of its social forms**

Direction 4

**Experiential and non-formal education,
volunteering and youth work**

**Stimulation of active citizenship among the
local population, empowering of local
leaders**

Direction 5

Target groups

Eco-Center in Stina works for:

- **participants of educational and youth events;**
 - **local inhabitants and youth;**
- **civic associations and other entities that share the values of the Eco-Center.**

We welcome you to cooperation!
