BREMEN, GERMANY 13.02.-17.02.23

Open Fields Training Course 3

Creativity, Digitalization, and Marketing

The project "Open Fields - Youth Creative Network" is a project designed for creative young people and artists between 18 and 30 years old. The aim is to train in the self-management of artistic projects and to create a network of young artists in each of the three communities participating in the project. The project wants to provide an opportunity for young people in different fields of arts to discover creative industries through professional inputs, visiting local artist organisations and learning from each other's ideas and experiences. We want to facilitate a space to learn about how to increase your art's visibility in both, your community and on an international level.

If you are selected by your national organisation, please fill out this **registration form**, so we have all the information we need to properly host you in Bremen!

We are looking forward to see you soon!
